

IFC's Impact in Sustainable Infrastructure

Building modern and sustainable infrastructure can improve climate resilience, support inclusive and sustainable growth, create jobs, and enhance lives by connecting people to essential services such as electricity, digital infrastructure, green transportation and clean water. However, emerging markets still face a significant infrastructure gap. IFC partners with the private sector and development partners to secure infrastructure projects that provide essential services while ensuring social and environmental standards are met.

Impact of IFC's infrastructure investments

Every year, IFC clients and partners

Provide electricity for millions of people around the globe

Transport millions of TEUs (Twenty-foot Equivalent Units) of cargo and tens of millions of airport passengers

Provide clean water and sanitation for tens of millions of people in developing countries

Invest billions of dollars in digital infrastructure, connecting communities and businesses in emerging markets

Our approach

IFC's focus is to improve access to climate-smart, sustainable infrastructure services in emerging markets, which in turn open markets, spur growth, and create jobs.

Working closely with the private sector, we help advance innovative financing solutions for infrastructure projects that deliver positive impact—connecting people to basic services, creating jobs, and improving lives.

About IFC

- World's largest development institution focused on the private sector in emerging markets
- Member of the World Bank Group with over 60 years of experience
- Impact investor and mobilizer of capital for sustainable development
- Leader in climate finance and green growth
- Trusted AAA-rated partner transforming innovative ideas into impactful investments
- Provider of advisory services for developing bankable projects, structuring public-private partnerships, and improving business environments
- Upholder of world-class ESG standards to ensure sustainable and responsible investments

The IFC difference

- We bring a **track record of experience** providing financing and structuring solutions for high-impact projects in developing countries, including low-income and fragile states.
- We offer a range of **financing and risk products** tailored to meet project and client's needs, including loans, equity, quasi equity, currency swaps, and local currency products, alongside World Bank and MIGA guarantees and insurance.
- We **mobilize funding** through IFC's syndications programs and by engaging with institutional investors.
- Our **team includes specialists** in sustainable infrastructure, sustainable financing, public-private partnerships (PPPs), transaction structuring, risk management, engineering, procurement, stakeholder engagement, communications, climate, and environmental, social, and governance standards.

Energy

Over the past decade, IFC has committed and mobilized over **\$31.0 billion** for energy projects. Our expertise in power generation, transmission, and distribution spans a range of technologies, with an emphasis on low-cost renewable energy, as well as energy storage and other emerging technologies.

Telecommunications, Media, and Technology

IFC is a leader in the telecommunications, media, and technology (TMT) sector in emerging markets. Over the past decade, IFC has committed and mobilized **\$9.6 billion** for digital infrastructure projects. We focus on building digital infrastructure, connecting the unconnected, and bridging the digital divide.

Waste Management and Circularity

Over the past decade, IFC committed and mobilized **\$1.36 billion** in water sector commitments. We engage with cities and private players in emerging markets to explore opportunities in the entire value chain. Our comprehensive, client-oriented solutions include investment and advisory services, access to blended finance, guarantees, and in-house expertise.

Cities

IFC's Cities Initiative combines investment and advisory services to address pressing urban needs through private sector participation. Over the past decade, IFC has committed and mobilized **\$2.07 billion** for municipal projects. Through this initiative, we have forged strategic partnerships with municipalities around the world, helping them build climate-resilient, sustainable cities. Projects focus on urban transportation, water services, waste management, district energy, and green buildings, among others.

Metals and Mining

Our investments and advisory services support sustainable business solutions in mining. Over the past decade, IFC committed and mobilized \$6.7 billion in the metals and mining sector. We spearhead pioneering investments in copper, gold, iron ore, bauxite, tin, diamonds, and other industrial ores and metals that are the ingredients of a low-carbon economy.

Transportation

IFC provides financing for ports, airports, railways, roads, logistics, urban transport, inland waterways, shipping, and airlines. Over the past decade, IFC committed and mobilized **\$11.2 billion** for transport projects to improve efficiency, relieve bottlenecks, facilitate trade, and create jobs.

Water

IFC has extensive experience in preparing, structuring, and financing complex water projects in emerging markets. Over the past decade, IFC committed and mobilized **\$1.96 billion** in water sector commitments. IFC provides investment and advisory services, partnering with public and private sector stakeholders to support the development of water and wastewater infrastructure. IFC's Utilities for Climate (U4C) initiative supports water utilities globally to improve their infrastructure and services, while addressing urgent climate challenges and preparing for long-term sustainability.
