

IFC's Impact in Sustainable Infrastructure

Emerging markets face massive infrastructure gaps. Building smart and sustainable infrastructure helps improve economic efficiency and increase climate resilience. It also supports inclusive and sustainable growth, creates jobs, and improves lives by connecting people to basic services such as digital access, power, and clean water. IFC offers long-term financing, sustainability-linked financing, and industry-leading expertise, partnering with the private sector to develop infrastructure projects that provide essential services while ensuring that social and environmental standards are met.

Impact of IFC's infrastructure investments

Every year, IFC's portfolio clients:

Provide electricity for 100 million people around the globe

Transport millions of TEUs (Twenty-foot Equivalent Units) of cargo and tens of millions of air travelers

Provide clean water and sanitation for tens of millions of people in developing countries

Spend billions on local goods and services

Connect more than 1 billion mobile users

Our approach

IFC projects are designed to improve access to energy, transportation, telecommunications, municipal, and environmental infrastructure. We support sustainable infrastructure through investments and advisory engagements that create jobs, build markets, and strengthen economies.

With a focus on early project development, IFC advises governments and supports sector reforms that can translate into private investment for priority projects and sectors. IFC can help streamline the origination process and support clients in all needed services to secure sustainability-driven outcomes.

About IFC

- Largest multilateral source of debt and equity financing for the private sector in developing countries
- AAA-rated by S&P and Moody's
- Loans, equity, quasi-equity, local currency and risk management products, capital markets access, and mobilization
- Advisory services to help develop priority projects, structure and tender PPPs, and improve financial management
- World-class social, environmental, and corporate governance standards and risk mitigation

The IFC difference

- We bring a **track record of experience** providing financing and structuring solutions for high-impact projects in developing countries, including low-income and fragile states.
- We offer a range of **financing and risk products** tailored to meet project needs, including loans, equity, quasi equity, currency swaps, and local currency products, alongside World Bank and MIGA guarantees and insurance.
- We **mobilize funding** through IFC's syndications programs and by engaging with institutional investors.
- Our **team includes specialists** in sustainable infrastructure, sustainability-linked financing, public-private partnerships (PPPs), transaction structuring, risk management, engineering, procurement, stakeholder engagement, communications, and environmental, social, and governance standards.

Waste Management

IFC has over \$1.2 billion in waste sector commitments. We engage with cities and private players in emerging markets to explore opportunities in the entire value chain. Our comprehensive, client-oriented solutions include investment and advisory services, access to blended finance, guarantees, and in-house expertise. www.ifc.org/wastemanagement

Sustainable Infrastructure Advisory

IFC supports businesses in building ESG credibility and avoiding greenwashing through proven solutions that bring shared benefits and help communities thrive in the new, green, digital, and resilient economy. www.ifc.org/sia

Transportation

IFC provides financing for ports, airports, railways, roads, logistics, urban transport, inland waterways, shipping, and airlines. Over the past decade, IFC committed and mobilized \$10.1 billion for transport projects to improve efficiency, relieve bottlenecks, facilitate trade, and create jobs. www.ifc.org/transportation

Municipal and Environmental Infrastructure

IFC provides financing, advisory services, and project development support for municipal and environmental infrastructure projects, including cities, water, and waste initiatives. Our engagements include private sector loans and equity, PPPs, municipal loans, and technical assistance to increase growth and improve efficiency. www.ifc.org/emi

Telecommunications, Media, and Technology

IFC is a leader in the tele-communications, media, and technology (TMT) sector in emerging markets. Over the past decade, IFC committed and mobilized \$6.8 billion for digital infrastructure projects. We focus on building digital infrastructure, connecting the unconnected, and bridging the digital divide. www.ifc.org/tmt

Cities

IFC's Cities Initiative combines investment and advisory services to address pressing urban needs through private sector participation. Through this initiative, we have forged strategic partnerships with municipalities around the world, helping them build climate-resilient, sustainable cities. Projects focus on urban transportation, water services, waste management, district energy, and green buildings, among others. www.ifc.org/cities

Energy

Over the past decade, IFC has committed and mobilized \$35 billion for energy projects. Our expertise in power generation, transmission and distribution spans a range of technologies, with an emphasis on low-cost renewable energy, as well as energy storage and other emerging technologies. www.ifc.org/energy

Water

IFC has extensive experience in preparing, structuring, and financing complex water projects in emerging markets. IFC provides investment and advisory services, partnering with public and private sector stakeholders to support the development of water and wastewater infrastructure. IFC's Utilities for Climate (U4C) initiative supports water utilities globally to improve their infrastructure and services, while addressing urgent climate challenges and preparing for long-term sustainability. www.ifc.org/water
www.ifc.org/U4C

Mining

Our investments and advisory services support sustainable business solutions in mining. Over the past decade, IFC committed and mobilized \$5.8 billion in the mining sector. We spearhead pioneering investments in copper, gold, iron ore, bauxite, tin, diamonds, and other industrial ores and metals that are the ingredients of a low-carbon economy. www.ifc.org/mining

All mobilization volumes for the past decade include MIGA mobilization.
